Presentation Format

Final presentations to judges will be 5 minutes long with an additional 5 minutes for questions from the judges. The recommended presentation length is 5 slides:

1. The problem you are tackling and the specific site(s) on campus
2. A 2-slide overview of your solution(s). Include pictures/screen captures of any prototypes, models, or drawings of your solution
3. A discussion on the impact of the proposed solution on the University of Waterloo's goals
4. An overview of the economics of the project

Make sure you pay attention to the judging criteria when you are putting your presentation together!

Judging Criteria

Ideation:

Justification	Why is this problem worth solving?
Innovation	How innovative is the solution?

Execution:

Feasibility	Is the solution technically feasible? Is there precedence for the proposed design?
Deployability	Can the idea be plausibly implemented in 3-5 years? Is the solution easy to implement?
Non-technical criteria	Have you considered non-technical criteria (e.g. aesthetics, impacts on health, culture, policy, inclusivity, etc.). Does the solution meet the needs of campus users?

Impact:

Impact	How impactful is the solution on campus climate goals in the short, medium, and long term?
Use of data	How is impact measured? What data were used?
Economic efficiency	Does the project achieve strong "bang for the buck"? What are the capital costs? What are the impacts uponoperating costs?

Demo/Pitch/Presentation:

Clarity	How clear was the presentation in terms of explanation?
Depth	Was the extent of the team's knowledge thoroughly expressed?
